Work Experience

Full Stack Developer | Avi Game Studio | Part time

May 2024 - August 2024

- Developed and maintained online games on a dynamic game hub platform using Angular
- Collaborated with a talented team to create immersive gaming experiences.
- Focused on enhancing user interfaces and gameplay for better player experiences.
- Utilized innovative solutions to solve complex technical challenges.
- Engaged in hands-on learning and professional growth within a supportive environment.

Internships

- **MViii Tech** - Intern as Front End developer
- **Innobyte Services** - Project on User Management API
- Attended Bootcamp on JavaScript Programming Essentials, SQL Essentials Offered by **Lets Upgrade**

Projects

1. Cine Compass : Movie recommendation application

Duration : 4 Weeks

Tech stacks : React, Node, Express, MongoDB, TMDb

- A user-friendly platform where movie enthusiasts can discover personalized recommendations based on their preferences, ratings, and viewing history, enhancing their overall entertainment experience.

2. IDA Creations company website

- Tech stacks: React, EmailJS
- Description: Developed a responsive front-end application for IDA Creations.
- Key Features:
 - Implemented a dynamic and user-friendly interface using React.
 - Integrated EmailJS in the contact section to enable direct email communication.
- Outcome: Delivered a seamless and efficient user experience, facilitating direct engagement with clients through the application.

3. User Management API

- Implemented a complete OTP (One-Time Password) authentication system using the MERN (MongoDB, Express.js, React.js, Node.js) stack. With this system, users can register for an account, verify their identity using OTP sent to their mobile number or email, and securely authenticate themselves.
